Before a permit may be issued for excavating for plumbing, including sewer and/or water, in any public street, way or alley, the person applying for such permit shall have executed unto the City of Rockwell and deposited with the City Clerk a corporate surety in the sum of five thousand dollars (\$5,000.00) conditioned that the applicant will perform faithfully all work with due care and skill, and in accordance with the laws, rules and regulations established under the authority of any Ordinances of the City of Rockwell pertaining to plumbing. This bond shall state that the person will indemnify and save harmless the City of Rockwell and the owner of the premises against all damages, costs, expenses, outlay and claims of every nature and kind arising out of unskillfulness or negligence on the applicant's part in connection with plumbing or excavating for plumbing as prescribed in this Ordinance. Such bond shall remain in force and must be executed for a period of two (2) years except that on such expiration it shall remain in force as to all penalties, claims and demands that may have accrued thereunder prior to such expiration.

2. All cost and expense incident to the installation and connection of the building sewer shall be borne by the owner. The owner shall indemnify the City from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

3. A separate and independent building sewer shall be provided for every building, except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, courtyard, or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer.

4. Old building sewers may be used in connection with new building sewers only when they are found, upon examination and testing by the Superintendent, to meet all requirements of this Ordinance. The Superintendent may require that the old sewer be excavated for the purpose of facilitating inspection. No old cesspool or septic tank shall be connected to any portion of a building sewer that is also connected to the public sewer. Cesspools and septic tanks shall be located, and drained in a manner approved by the Superintendent and removed or filled with sand, crushed rock or any other solid material approved by the Superintendent, except as exempted by the Superintendent.

5. The building sewer shall be constructed in accordance with applicable portions of the last published (State Plumbing Code of Iowa), applicable specifications of the American Society for Testing and Materials (ASTM) and applicable portions of the Water Pollution Control Federation (WPCF) Manual of Practice No. 9."

a. Each connection to the public sewer shall be made to the fittings designated for that property. If a fitting in the public sewer is not available for the designated property, the connection shall then be made under the direct supervision of the Superintendent. Connections to the public sewer not made to an existing wye or tee shall be made by a hole cutter or careful chisel cutting. The connection shall be rendered water and gas tight, by use of rubber gaskets. The building sewer shall not protrude into the public sewer.

b. All building sewers shall be constructed of the following materials conforming to the indicated standards:

Vitrified Clay Pipe VCP

(1) Pipe and Fittings - ASTM C-700 "Standard Specification for Vitrified Clay Pipe, Extra Strength, Standard Strength and Perforated."

(2) Coupling and Joints - ASTM C-425 "Standard Specification for Compression Joints for Vitrified Clay Pipe and Fittings".

Extra Heavy Cast Iron Soil Pipe

(1) Pipe and Fittings - ASTM A-74 "Standard Specification for Cast Iron Soil Pipe and Fittings."

(2) Joints - ASTM C-564 "Standard Specification for Rubber Gaskets for Cast Iron Soil Pipe and Fittings."

Polyvinyl Chloride (PVC)

Polyvinyl Chloride (PVC) and joints shall be installed according to the manufacturers' recommendations and shall conform to:

(1) Pipe - A.S.T.M. D-3034, "Type P.S.M. Poly (PVC) and Fittings."

Minimum wall thickness:

4" - 0.125"

6" - 0.180"

8" - 0.240"

10" - 0.300"

(2) Joints - A.S.T.M. D-1869, A.S.T.M. D-1312, "Flexible Elastomeric Seals."

c. No building sewer for residential or commercial buildings shall be less than four inches in diameter. No building sewer for industries or multiple dwellings shall be less than six inches in diameter.

d. Unless otherwise authorized, all building sewers shall have a grade of not less than one-eighth (1/8) inch per foot. A grade of one-fourth (1/4) inch per foot shall be used wherever practical.

e. All excavation shall be open trench work unless authorized by the Superintendent. The foundation in the trench shall be formed to prevent any subsequent settlement of the pipes. If the foundation is good firm earth, the earth shall be pared or molded to give a full support to the lower quadrant of each pipe. Bell holes shall be dug. Where the floor of the trench is of hard or rocky material, the trench shall be excavated to four inches below the pipe and brought back to the proper grade with gravel, coarse sand or similar material so as to provide a firm foundation and uniform support for the building sewer line. Backfilling shall be placed in layers and solidly tamped or packed

up to two feet above the pipe. Back-filling shall not be done until final inspection is made by the Superintendent. Building sewers shall be laid straight at uniform grade between connections or fittings.

f. Cleanouts shall be provided for each change in direction or grade if the change exceeds 45 degrees and at least every 100 feet.

6. Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. The depth shall be sufficient to afford protection from frost. All excavations required for the installation of a building sewer shall be open trench work unless otherwise approved by the said Superintendent. Pipe laying and backfill shall be performed in accordance with A.S.T.M. Specification (Designation C12). No backfill shall be placed until the work has been inspected by the Superintendent or the Superintendent's representative. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.

7. No person shall make connection of roof downspouts, exterior foundation drains, areaway drains, or other sources of surface runoff or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer.

8. The connection of the building sewer into the public sewer shall conform to the requirements of the Plumbing Code or other applicable rules and regulations of the City, or the procedures set forth in appropriate specifications of the A.S.T.M. and the W.P.C.F. Manual of Practice No. 9. All such connections shall be made gastight and watertight. Any deviation from the prescribed procedures and materials must be approved by the Superintendent before installation.

9. Each and every part of the building sewer shall be inspected and approved by the Superintendent before being concealed or back-filled. The applicant for the building sewer permit shall notify the Superintendent when the building sewer is ready for inspection and connection to the public sewer. The connection shall be made under the supervision of the Superintendent or the Superintendent's representative.

10. All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways, and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the City.

11. The City shall, in no event, be held responsible for claims made against it by reason of the breaking of any mains or service pipes, or by reason of any other interruption of the service caused by the breaking of machinery or stoppage for necessary repairs; and no person shall be entitled to damages nor have any portion of a payment refunded for any interruption.

12. The premises receiving sanitary sewer service, shall at all reasonable hours, be subject to inspection by duly authorized personnel of the City.

13. The Owner of the property served by a building sewer shall be responsible for the operation, maintenance, repair, blockage, surface replacement, and any damage resulting from operation, maintenance repair and blockage of said building sewer, from the point of connection with the building drain to the Public Sewer main.

6-2-5 USE OF THE PUBLIC SEWERS.

1. No person shall discharge or cause to be discharged any stormwater, surface water, groundwater, roof runoff, subsurface drainage, including interior and exterior foundation drains, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer. Applications may be cancelled and/or sewer service discontinued by the City for any violation of any rule, regulation or condition of service, and especially for any of the following reasons:

a. Misrepresented in the application as to the property or fixtures to be serviced by the sanitary sewer system.

b. Non-payment of bills.

c. Improper or imperfect service pipes and fixtures, or failure to keep same in suitable state of repair.

2. Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as combined sewers or storm sewers, or to a natural outlet approved by the Superintendent. Industrial cooling water or unpolluted process waters may be discharged, on approval of the Superintendent, to a storm sewer, combined sewer, or natural outlet.

3. No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

a. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.

b. Any waters or wastes containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant, including but not limited to cyanides in excess of two (2) mg/l as CN in the wastes as discharged to the public sewer.

c. Any waters or wastes having a ph lower than 5.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.

d. Solid or viscous substances in quantities of such size capable of causing obstruction to the flow of sewers, or other interference with the proper operation of the sewage works such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and fleshings, entrails and paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders.

e. Any water or wastes having (1) a 5-day bio-chemical oxygen demand greater than 300 parts per million by weight, or (2) containing more than 350 parts per million by weight, or suspended solids, or (3) having an average daily flow greater than 2 percent of the average sewage flow of the City, shall be subject to the review of the Superintendent. Where necessary in the opinion of the Superintendent, the owner shall provide at the owner's expense, such preliminary treatment as may be necessary to (1) reduce the biochemical oxygen demand to 300 parts per million by weight, or (2) reduce the suspended solids to 350 parts per million by weight, or (3) control the quantities and rates

of discharge of such waters or wastes. Plans, specifications, and any other pertinent information relating to proposed preliminary treatment facilities shall be submitted for the approval of the Superintendent and no construction of such facilities shall be commenced until said approvals are obtained in writing.

4. No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming an opinion as to the acceptability of these wastes, the Superintendent will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances prohibited are:

- a. Any liquid or vapor having a temperature higher than one hundred fifty (150) F (65 C).
- b. Any water or wastes containing fats, wax, grease or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may solidify or become viscous at temperatures between thirty-two (32) and one hundred fifty (150) F (0 and 65 C).
- c. Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of three-fourths (3/4) horsepower (0.76 hp metric) or greater shall be subject to the review and approval of the Superintendent.
- d. Any waters or wastes containing strong acid iron pickling wastes, or concentrated plating solutions whether neutralized or not.
- e. Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances, or wastes exerting an excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Superintendent for such materials.
- f. Any waters or wastes containing phenols or other taste-or-odor-producing substances, -in such concentrations exceeding limits which may be established by the Superintendent as necessary after treatment of the composite sewage, to meet with requirements of the State, Federal, or other public agencies with jurisdiction for such discharge to the receiving waters.
- g. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Superintendent in compliance with applicable State or Federal regulations.
- h. Any waters or wastes having a pH in excess of 9.5.
- i. Materials which exert or cause:
 - (1) Unusual concentrations of inert suspended solids (such as, but not limited to, Fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).

(2) Excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions).

(3) Unusual BOD, chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.

(4) Unusual volume of flow or concentration of waters constituting "slugs" as defined herein.

j. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

5. If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in 6-2-5(4), and which in the judgment of the Superintendent, may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Superintendent may:

a. Reject the wastes,

b. Require pretreatment to an acceptable condition for discharge to the public sewers.

c. Require control over the quantities and rates of discharge, and/or

d. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provision of 6-2-5(10) of this article.

If the Superintendent permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Superintendent, and subject to the requirements of all applicable codes, Ordinances, and laws.

6. Grease, oil, and sand interceptors shall be provided when, in the opinion of the Superintendent, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Superintendent, and shall be located as to be readily and easily accessible for cleaning and inspection.

7. Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at the owner's expense.

8. When required by the Superintendent, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Superintendent. The manhole shall be

installed by the owner at the owner's expense, and shall be maintained by the owner so as to be safe and accessible at all times.

9. All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in this Ordinance shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater," published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. (The particular analyses involved will determine whether a twenty-four (24) hour composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from 24 hour composite of all outfalls where pH's are determined from periodic grab samples).

10. No statement contained in this article shall be construed as preventing any special agreement or arrangement between the City and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the City for treatment, subject to payment, therefore, by the industrial concern.

6-2-6 PROTECTION FROM DAMAGE.

1. No unauthorized person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is a part of the sewage works. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct.

(Code of Iowa, Sec. 716.1)

6-2-7 POWERS AND AUTHORITY TO INSPECTORS.

1. The Superintendent and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all properties for the purpose of inspection, observation, measurement, sampling, and testing in accordance with the provisions of this Ordinance. The Superintendent or the Superintendent's representatives shall have no authority to inquire into any processes including metallurgical, chemical, oil, refining, ceramic, paper, or other industries beyond that point having a direct bearing on the kind and source of discharge to the sewers or waterways or facilities for waste treatment.

2. While performing the necessary work on private properties referred to in 6-2-7(1), the Superintendent or duly authorized employees of the City shall observe all safety rules applicable to the premises established by the company and the company shall be held harmless for injury or death to the City employees and the City shall indemnify the company against loss or damage to its property by the City employees and against liability claims and demands for personal injury or property damage asserted against the company and growing out of the gauging and sampling operation, except as such may be caused by negligence or failure of the company to maintain safe conditions as required in Section 6-2-5(8).

3. The Superintendent and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all private properties through which the City holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the sewage works lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

6-2-8 PENALTIES.

1. Any person found to be violating any provision of this Ordinance except Section 6-2-6 shall be served by the City with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.

2 Any person violating any of the provisions of this Ordinance is liable to the City for any expense, loss, or damage occasioned the City by reason of such violations.

6-3-1 ENFORCEMENT. The Superintendent of Public Works shall supervise the installation of water service pipes and their connections to the water main and enforce all regulations pertaining to water services in this City in accordance with this chapter. This chapter shall apply to all replacements of existing service pipes as well as to new ones. The City Council shall make such rules, not in conflict with the provisions of this chapter, as needed for the detailed operation of the waterworks. In the event of an emergency the Superintendent may make temporary rules for the protection of the system until due consideration by the City Council may be had.

(Code of Iowa, Sec. 372.13(4))

6-3-2 ADOPTION OF STATE PLUMBING CODE. The installation of any water-service pipe and any connection with the municipal water system shall comply with all pertinent and applicable provisions, whether regulatory, procedural or enforcement provisions, of the State Plumbing Code as amended and as published by the Iowa Department of Public Health, which is hereby adopted. An official copy of the State Plumbing Code as adopted and a certified copy of this Ordinance are on file in the office of the City Clerk for public inspection.

6-3-3 APPROVAL REQUIRED. All installation of water service pipes and connections to the municipal water system shall be made by a plumber approved by this City. The Superintendent shall have the power to suspend the approval of any plumber for violation of any of the provisions of this Ordinance. A suspension, unless revoked, shall continue until the next regular meeting of the City Council. The Superintendent shall notify the plumber immediately by personal written notice of the suspension, the reasons for the suspension, and the time and place of the City Council meeting at which the plumber will be granted a hearing. At this City Council meeting the Superintendent shall make a written report to the City Council stating the Superintendent's reasons for the suspension, and the City Council, after fair hearing, shall revoke the suspension or take any further action that is necessary and proper.

6-3-4 MANDATORY CONNECTIONS. All residences and business establishments within the City limits intended or used for human habitation, occupancy or use shall be connected to the public water supply if it is reasonably available and if the building is not furnished with pure and wholesome water from some other source. No plumbing system shall be connected to both the public water system and a private water source.

6-3-5 PERMIT. Before any person, firm, corporation or other association shall make a connection with the public water system, a written permit must be obtained from the Superintendent. The application for the permit shall be filed with the Superintendent on blanks furnished by the Superintendent. The application shall include a legal description of the property, the name of the property owner, the name and address of the person who will do the work, and the general uses of the water. No different or additional uses shall be allowed except by written permission of the Superintendent. The Superintendent shall issue the permit, bearing the Superintendent's signature and stating the time of issuance, if the proposed work meets all the requirements of this Ordinance and if all fees required under this Ordinance have been paid. Work under any permit must be begun within six (6) months after it is issued. The Superintendent may at any time revoke the permit for any violation of this Ordinance and require that the work be stopped. The owner or plumber may appeal such action in the manner provided in Section 6-3-3 of this Ordinance.

(Code of Iowa, Sec. 372.13(4))

6-3-6 WATER SUPPLY CONTROL. The plumber who makes the connection to the municipal water system shall install a main shut-off valve of the inverted key type on the water-service pipe near the curb with a suitable lock of a pattern approved by the Superintendent. The shut-off valve shall be covered with a heavy metal cover having the letter "W" marked thereon, visible and even with the pavement or ground.

The plumber also shall install a shut-off valve and waste cock on every service pipe inside the building near the entrance of the water-service pipe into the building; this must be located so that the water can be shut off conveniently and the pipes drained. Where one service pipe is installed to supply more than one customer, there shall be separate shut-off valves inside the building for each customer so that service to one customer can be shut off without interfering with service to the others.

6-3-7 MAKING THE CONNECTION. Any connection with the municipal water system must be made under the direct supervision of the Superintendent or the Superintendent's authorized assistant. All taps in the water main must be at least (12) inches apart and on the side and near the top and not in any case within 18 inches of the hub.

(Code of Iowa, Sec. 372.13(4))

6-3-8 EXCAVATIONS. Excavations to do work under this Ordinance shall be dug so as to occasion the least possible inconvenience to the public and to provide for the passage of water along the gutter. All such excavations shall have proper barricades at all times, and warning lights placed from one-half hour before sunset to one-half hour after sunrise. In refilling the excavation the earth must be laid in layers and each layer tamped thoroughly to prevent settlement, and this work, and any street, sidewalk, pavement or other public property that is affected, must be restored to as good a condition as it was previous to the excavation. The plumber must maintain the affected area in good repair to the satisfaction of the City Council for three months after refilling. All water service pipes must be laid so as to prevent rupture by settlement or freezing. No excavation shall be made within six (6) feet of any laid water or sewer pipe while the ground is frozen, and no water or sewer pipe shall be exposed to frost, except by special written permission of the Superintendent.

6-3-9 INSPECTION AND APPROVAL. All water-service pipes and their connections to the municipal water system must be inspected and approved in writing by the Superintendent before they are covered, and the Superintendent shall keep a record of such approvals. If the Superintendent refuses to approve the work, the plumber or owner must proceed immediately to correct the work so that it will meet with the Superintendent's approval. Every person who uses or intends to use the

municipal water system shall permit the Superintendent or the Superintendent's authorized assistants to enter the premises to inspect and make necessary alterations or repairs at all reasonable hours and on proof of authority.

(Code of Iowa, Sec. 372.13(4))

6-3-10 **COMPLETION BY THE CITY.** Should any excavation be left open or partly refilled for twenty-four (24) hours after the water-service pipe is installed and connected with the municipal water system, or should the work be improperly done, the Superintendent shall have the right to finish or correct the work, and the City Council shall assess the costs to the property owner or the plumber. If the plumber is assessed, the plumber must pay the costs before the plumber can receive another permit, and the plumber's bond required by the Plumbing Ordinance shall be security for the assessment. If the property owner is assessed, such assessment shall be collected with and in the same manner as general property taxes.

(Code of Iowa, Sec. 364.12(3)(h))

6-3-11 **METER ACCURACY AND TEST.** All water shall be supplied through meters that accurately measure the amount of water supplied to any building. The Superintendent or the Superintendent's assistant shall make a test of the accuracy of any water meter at any time when requested in writing. If it is found that such meter overruns to the extent of two (2%) percent or more, the cost of the tests shall be paid by the City and a refund shall be made to the customer for overcharges collected since the last known date of accuracy but not for longer than six (6) months. If the meter is found to be accurate or slow less than two (2%) percent fast, the patron shall pay the reasonable costs of the tests.

Compulsory Check. Every meter shall be removed from service at least once each ten (10) years and thoroughly tested for accuracy. Any meter found inaccurate beyond a tolerance of one and one half (1.5%) percent shall not be returned to service until properly adjusted.

6-3-12 **DAMAGING WATER PROPERTY.** It shall be unlawful to break, injure, mar or deface, interfere with or disturb and building, machinery, apparatus, fixtures, hydrants, attachments or appurtenances of the waterworks or any public or private hydrant or water trough, or stop-cock box, meter, water supply or service pipe or any part thereof, or depositing anything in any stop-cock box, or commit any act tending to obstruct or impair the intended use of any of the above mentioned property, without permission of the proper authorities or excepting cases herein or otherwise provided by Ordinance.

6-3-13 **AUTHORIZED USE OF HYDRANTS.** All hydrants erected for the purpose of extinguishing fires are hereby declared to be public hydrants. No person except members of the fire department, or persons especially authorized by the water superintendent, and then only in the exercise of authority delegated, shall open any of said hydrants or attempt to uncover or remove any protection from or in any manner interfere with any of the hydrants.

6-3-14 **CLEARANCE AROUND HYDRANTS.** No person shall place or keep any post, fence, vehicle, growth, vegetation, trash, or storage of other materials that would obstruct a fire hydrant or fire protection appliance and hinder or prevent its immediate use by fire department personnel. There shall be a minimum of three (3') feet clearance, to any obstruction, around the circumference of each fire hydrant. Such fire hydrant or fire protection appliance shall be maintained readily visible at all times. A minimum of eighteen (18") inch clearance must be maintained from the ground to the center of the lowest discharge outlet.

6-3-15 PROPERTY OWNERS RESPONSIBILITY. The Owner of the property served by the municipal water system shall be responsible for the operation, maintenance, repair, surface replacement, and any damage resulting from operation, maintenance and repair of said water system, from the point of connection at the curb stop and including all service to the structure, except the meter as described in 6-3-11. The City shall be responsible for the curb stop.

CHAPTER 6 FLOODPLAIN MANAGEMENT

SECTION I - Statutory Authority, Findings of Fact and Purpose

A. The Legislature of the State of Iowa has in Chapter 364, Code of Iowa, as amended, delegated the power to cities to exercise any power and perform any function it deems appropriate to protect and preserve the rights, privileges and property of the city or of its residents, and to preserve and improve the peace, safety, health, welfare, comfort and convenience of its residents.

B. Findings of Fact

1. The flood hazard areas of the City of Rockwell, Iowa, are subject to periodic inundation which can result in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief, and impairment of the tax base all of which adversely affect the public health, safety and general welfare of the community.
2. These flood losses, hazards, and related adverse effects are caused by: (i) The occupancy of flood hazard areas by uses vulnerable to flood damages which create hazardous conditions as a result of being inadequately elevated or otherwise protected from flooding and (ii) the cumulative effect of obstructions on the flood plain causing increases in flood heights and velocities.

C. Statement of Purpose

It is the purpose of this Ordinance to protect and preserve the rights, privileges and property of the City of Rockwell, Iowa, and its residents and to preserve and improve the peace, safety, health, welfare, and comfort and convenience of its residents by minimizing those flood losses described in Section IB1 of this Ordinance with provisions designed to:

1. Restrict or prohibit uses which are dangerous to health, safety or property in times of flood or which cause excessive increases in flood heights or velocities.
2. Require that uses vulnerable to floods, including public facilities which serve such uses, be protected against flood damage at the time of initial construction or substantial improvement.
3. Protect individuals from buying lands which may not be suited for intended purposes because of flood hazard.
4. Assure that eligibility is maintained for property owners in the community to purchase flood insurance through the National Flood Insurance Program.

SECTION II - General Provisions

A. Lands to Which Ordinance Apply

The provisions of this Ordinance shall apply to all areas having special flood hazards within the jurisdiction of the City of Rockwell, Iowa. For the purpose of this Ordinance, the special flood hazard areas are those areas designated as Zone A on the Flood Insurance Rate Map (FIRM) for Cerro Gordo County and Incorporated Areas, City of Rockwell, Panel 19033C0355C, 0360C, dated May 16, 2011, which is hereby adopted and made a part of this Ordinance.

B. Rules for Interpretation of Flood Hazard Boundaries

The boundaries of the Special Flood Hazard areas shall be determined by scaling distances on the official Flood Insurance Rate Map. When an interpretation is needed as to the exact location of a boundary, the City Superintendent shall make the necessary interpretation. The Rockwell City Council shall hear and decide appeals when it is alleged that there is an error in any requirement, decision, or determination made by the City of Rockwell in the enforcement or administration of this Ordinance.

C. Compliance

No structure or land shall hereafter be used and no structure shall be located, extended, converted or structurally altered without full compliance with the terms of this Ordinance and other applicable regulations which apply to uses within the jurisdiction of this Ordinance.

D. Abrogation and Greater Restrictions

It is not intended by this Ordinance to repeal, abrogate or impair any existing easements, covenants, or deed restrictions. However, where this Ordinance imposes greater restrictions, the provision of this Ordinance shall prevail. All other ordinances inconsistent with this Ordinance are hereby repealed to the extent of the inconsistency only.

E. Interpretation

In their interpretation and application, the provisions of this Ordinance shall be held to be minimum requirements and shall be liberally construed in favor of the governing body and shall not be deemed a limitation or repeal of any other powers granted by State statutes.

F. Warning and Disclaimer of Liability

The standards required by this Ordinance are considered reasonable for regulatory purposes. This Ordinance does not imply that areas outside the designated special flood hazard areas will be free from flooding or flood damages. This Ordinance shall not create liability on the part of the City of Rockwell, Iowa, or any officer or employee thereof for any flood damages that from reliance on this Ordinance or any administrative decision lawfully made thereunder.

G. Severability

If any section, clause, provision or portion of this Ordinance is adjudged unconstitutional or invalid by a court of competent jurisdiction, the remainder of this Ordinance shall not be affected thereby.

SECTION III - Flood Plain Management Standards

All uses must be consistent with the need to minimize flood damage and meet the following applicable performance standards. Where 100-year flood data has not been provided on the Flood Insurance Rate Map, the Iowa Department of Natural Resources shall be contacted to compute such data. The applicant will be responsible for providing the Department of Natural Resources with sufficient technical information to make such determination.

A. All development within the special flood hazard areas shall:

1. Be consistent with the need to minimize flood damage.
2. Use construction methods and practices that will minimize flood damage.
3. Use construction materials and utility equipment that are resistant to flood damage.
4. Obtain all other necessary permits from federal, state and local governmental agencies including approval when required from the Iowa Department of Natural Resources.

B. Residential buildings - All new or substantially improved residential structures shall have the lowest floor, including basement, elevated a minimum of one (1) foot above the 100-year flood level. Construction shall be upon compacted fill which shall, at all points, be no lower than 1.0 ft. above the 100-year flood level and extend at such elevation at least 18 feet beyond the limits of any structure erected thereon. Alternate methods of elevating (such as piers) may be allowed subject to favorable consideration by the City Council, where existing topography, street grades, or other factors preclude elevating by fill. In such cases, the methods used must be adequate to support the structure as well as withstand the various forces and hazards associated with flooding.

All new residential structures shall be provided with a means of access which will be passable by wheeled vehicles during the 100-year flood.

C. Non-residential buildings - All new or substantially improved non-residential buildings shall have the lowest floor (including basement) elevated a minimum of one (1) foot above the 100-year flood level, or together with attendant utility and sanitary systems, be floodproofed to such a level. When floodproofing is utilized, a professional engineer registered in the State of Iowa shall certify that the floodproofing methods used are adequate to withstand the flood depths, pressures, velocities, impact and uplift forces and other factors associated with the 100-year flood; and that the structure, below the 100-year flood level is watertight with walls substantially impermeable to the passage of water.

A record of the certification indicating the specific elevation (in relation to National Geodetic Vertical Datum 1988) to which any structures are floodproofed shall be maintained by the Administrator.

D. All new and substantially improved structures:

1. Fully enclosed areas below the "lowest floor" (not including basements) that are subject to flooding shall be designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of floodwaters. Designs for meeting this requirement must

either be certified by a registered professional engineer or meet or exceed the following minimum criteria:

- a. A minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding shall be provided.
- b. The bottom of all openings shall be no higher than one foot above grade.
- c. Openings may be equipped with screens, louvers, valves, or other coverings or devices provided they permit the automatic entry and exit of floodwaters.

Such areas shall be used solely for parking of vehicles, building access and low damage potential storage.

2. New and substantially improved structures must be designed (or modified) and adequately anchored to prevent flotation, collapse, or lateral movement of the structure resulting from hydrodynamic and hydrostatic loads, including the effects of buoyancy.
3. New and substantially improved structures must be constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding.

E. Factory-built homes:

1. All factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be elevated on a permanent foundation such that the lowest floor of the structure is a minimum of one (1) foot above the 100-year flood level.
2. All factory-built homes, including those placed in existing factory-built home parks or subdivisions, shall be anchored to resist flotation, collapse, or lateral movement. Methods of anchoring may include, but are not limited to, use of over-the-top or frame ties to ground anchors.

F. Utility and Sanitary Systems:

1. On-site waste disposal and water supply systems shall be located or designed to avoid impairment to the system or contamination from the system during flooding.
2. All new and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters into the system as well as the discharge of effluent into flood waters. Wastewater treatment facilities (other than on-site systems) shall be provided with a level of flood protection equal to or greater than one (1) foot above the 100-year flood elevation.
3. New or replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system. Water supply treatment facilities (other than on-site systems) shall be provided with a level of protection equal to or greater than one (1) foot

above the 100-year flood elevation.

4. Utilities such as gas or electrical systems shall be located and constructed to minimize or eliminate flood damage to the system and the risk associated with such flood damaged or impaired systems.
- G. Storage of materials and equipment that are flammable, explosive or injurious to human, animal or plant life is prohibited unless elevated a minimum of one (1) foot above the 100-year flood level. Other material and equipment must either be similarly elevated or (i) not be subject to major flood damage and be anchored to prevent movement due to flood waters or (ii) be readily removable from the area within the time available after flood warning.
- H. Flood control structural works such as levees, flood walls, etc. shall provide, at a minimum, protection from a 100-year flood with a minimum of 3 ft. of design freeboard and shall provide for adequate interior drainage. In addition, structural flood control works shall be approved by the Department of Natural Resources.
- I. Watercourse alterations or relocations must be designed to maintain the flood carrying capacity within the altered or relocated portion. In addition, such alterations or relocations must be approved by the Department of Natural Resources.
- J. Subdivisions (including factory-built home parks and subdivisions) shall be consistent with the need to minimize flood damages and shall have adequate drainage provided to reduce exposure to flood damage. Development associated with subdivision proposals (including the installation of public utilities) shall meet the applicable performance standards of this Ordinance. Subdivision proposals intended for residential use shall provide all lots with a means of access which will be passable by wheeled vehicles during the 100-year flood. Proposals for subdivisions greater than five (5) acres or fifty (50) lots (whichever is less) shall include 100-year flood elevation data for those areas located within the Special Flood Hazard Area.
- K. Accessory Structures
1. Detached garages, sheds, and similar structures accessory to a residential use are exempt from the 100-year flood elevation requirements where the following criteria are satisfied.
 - a. The structure shall not be used for human habitation.
 - b. The structure shall be designed to have low flood damage potential.
 - c. The structure shall be constructed and placed on the building site so as to offer minimum resistance to the flow of floodwaters.
 - d. The structure shall be firmly anchored to prevent flotation which may result in damage to other structures.
 - e. The structure's service facilities such as electrical and heating equipment shall be elevated or floodproofed to at least one foot above the 100-year flood level.

2. Exemption from the 100-year flood elevation requirements for such a structure may result in increased premium rates for flood insurance coverage of the structure and its contents.

L. Recreational Vehicles

1. Recreational vehicles are exempt from the requirements of Section III E of this Ordinance regarding anchoring and elevation of factory-built homes when the following criteria are satisfied.
 - a. The recreational vehicle shall be located on the site for less than 180 consecutive days, and,
 - b. The recreational vehicle must be fully licensed and ready for highway use. A recreational vehicle is ready for highway use if it is on its wheels or jacking system and is attached to the site only by quick disconnect type utilities and security devices and has no permanently attached additions.
2. Recreational vehicles that are located on the site for more than 180 consecutive days or are not ready for highway use must satisfy requirements of Section III E of this Ordinance regarding anchoring and elevation of factory-built homes.

M. Pipeline river and stream crossings shall be buried in the streambed and banks, or otherwise sufficiently protected to prevent rupture due to channel degradation and meandering.

SECTION IV - Administration

A. Appointment, Duties and Responsibilities of Flood Plain Administrator

1. The City Superintendent is hereby appointed to implement and administer the provisions of this Ordinance and will herein be referred to as the Administrator.
2. Duties of the Administrator shall include, but not necessarily be limited to the following:
 - a. Review all flood plain development permit applications to assure that the provisions of this Ordinance will be satisfied.
 - b. Review flood plain development applications to assure that all necessary permits have been obtained from federal, state and local governmental agencies including approval when required from the Department of Natural Resources for flood plain construction.
 - c. Record and maintain a record of the elevation (in relation to National Geodetic Vertical Datum 1988) of the lowest floor (including basement) of all new or substantially improved structures in the special flood hazard area.
 - d. Record and maintain a record of the elevation (in relation to National Geodetic Vertical Datum 1988) to which all new or substantially improved structures have been floodproofed.

Variances shall only be granted upon: (i) a showing of good and sufficient cause, (ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant, and (iii) a determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local codes or ordinances.
 - b. Variances shall only be granted upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.
 - c. In cases where the variance involves a lower level of flood protection for buildings than what is ordinarily required by this Ordinance, the applicant shall be notified in writing over the signature of the Administrator that: (i) the issuance of a variance will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage and (ii) such construction increases risks to life and property.
2. Factors Upon Which the Decision of the Council Shall be Based - In passing upon applications for Variances, the Council shall consider all relevant factors specified in other sections of this Ordinance and:
 - a. The danger to life and property due to increased flood heights or velocities caused by encroachments.
 - b. The danger that materials may be swept on to other land or downstream to the injury of others.
 - c. The proposed water supply and sanitation systems and the ability of these systems to prevent disease, contamination and unsanitary conditions.
 - d. The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner.
 - e. The importance of the services provided by the proposed facility to the City.

- f. The requirements of the facility for a flood plain location.
 - g. The availability of alternative locations not subject to flooding for the proposed use.
 - h. The compatibility of the proposed use with existing development and development anticipated in the foreseeable future.
 - i. The relationship of the proposed use to the comprehensive plan and flood plain management program for the area.

- a. Modification of waste disposal and water supply facilities.
 - b. Limitation of periods of use and operation.
 - c. Imposition of operational controls, sureties, and deed restrictions.

subdivision for which the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads) is completed before the effective date of the flood plain management regulations adopted by the community.

EXPANSION OF EXISTING FACTORY-BUILT HOME PARK OR SUBDIVISION - The preparation of additional sites by the construction of facilities for servicing the lots on which the factory-built homes are to be affixed (including at a minimum, the installation of utilities, the construction of streets, and either final site grading or the pouring of concrete pads).

FLOODWAY FRINGE - Those portions of the flood plain, other than the floodway, which can be filled, leveed, or otherwise obstructed without causing substantially higher flood levels or flow velocities.

HISTORIC STRUCTURE - Any structure that is:

The actual start means either the first placement or permanent construction of a structure on a site, such as pouring of a slab or footings, the installation of pile, the construction of columns, or any work beyond the stage of excavation; or the placement of a factory-built home on a foundation.

1. Any repair, reconstruction, or improvement of a structure, the cost of which equals or exceeds fifty (50) percent of the market value of the structure either (i) before the "start of construction" of the improvement , or (ii) if the structure has been "substantially damaged" and is being restored, before the damage occurred.

The term does not, however, include any project for improvement of a structure to comply with existing state or local health, sanitary, or safety code specifications which are solely necessary to assure safe conditions for the existing use. The term also does not include any alteration of an "historic structure", provided the alteration will not preclude the structure's designation as an "historic structure".

2. Any addition which increases the original floor area of a building by 25 percent or more. All additions constructed on or after the effective date of the first floodplain management regulations adopted by the community shall be added to any proposed addition in determining whether the total increase in original floor space would exceed 25 percent.
